

DWSD INTRODUCES NEW EMAIL ADDRESS TO SHARE IDEAS WITH DWSD JOB DESIGNS TEAMS

As the Detroit Water and Sewerage Department (DWSD) continues to move towards positive change with the Organizational Optimization Project, we invite you to take part in our team effort to shape the way we work, design our jobs and improve the future of DWSD. Five (5) job design teams are designing our new jobs and a new flexible team-based approach to completing our work at DWSD. The following are general descriptions of the scope of our job design teams:

Water Operations Team: Responsible for the operations and maintenance functions, local administration, plant engineering, sampling and testing and support for the five (5) water plants and system control.

Wastewater Operations Team: Responsible for the operations and maintenance functions, local administration, plant engineering, sampling and testing and support for the wastewater plant.

Field Services Operations Team: Responsible for the operations and maintenance functions for all in-ground assets, pump stations, CSO facilities and outside the fence assets.

Finance and Administration Team: Responsible for customer service, finance and human resources.

IT and Support Team: Responsible for support functions such as information technology, security, clerical and engineering.

We are requesting that you share your ideas to improve our services at dwsd-orgopt-project@dwsd.org. A project team coordinator will acknowledge receipt of your submission within 48 hours.

We value your feedback and hope that you will engage in this opportunity as DWSD embarks on a new way of doing business.
